

Welcome to the 1st German-Japanese Summer School on
**Human-Centred Perception Modelling
in Extended Reality**

Nice to have you here ♡

Content

DAY 1

Expert Input

Researchers from Germany and Japan introduce key topics in XR, perception, AI, and robotics through a series of lectures.

DAY 2

Research Ideation

In cross-cultural teams: identify a research question, review the literature, and scope a study or experiment.

DAYS 3

Design and Evaluate

Design your study, then evaluate and refine your concept with peer and faculty feedback.

DAY 5

Share and Go Further

Present team results on the final day. Promising projects may continue towards joint publications.

L1 Modelling Visual Attention Computational models of where and how humans direct visual attention in real and virtual scenes.	L2 Multisensory Perception and Sensory Integration How the brain combines information from vision, hearing, touch, and proprioception into a unified percept.	L3 Vision Augmentation in Extended Reality Techniques for enhancing and modifying visual perception through AR and VR display systems.
L4 Human-Machine Interaction Principles and methods for designing effective interfaces between humans and intelligent machines.	L5 Comfort Intelligence for Human-Robot Interaction Modelling and predicting human comfort to guide the behaviour of robots in shared spaces.	L6 Designing User Studies for XR Research Experimental design, ethics, measurement, and statistical analysis in the context of extended reality.

Team

Cybernetics and Reality Engineering (CARE) Laboratory

Dr.
Alexander Marquardt

Asst. Prof.
Monica Perusquia

Interactive Media Design (IMD) Laboratory

Asst. Prof.
Taishi Sawabe

Asst. Prof.
Isidro Butaslac

Learning and Visual Systems (LAVIS) Laboratory

Prof.
Dirk Voelz

Prof.
Martin Weier

Prof.
Biying Fu

Social Activities

Tuesday, September 15

Welcome Dinner at an Izakaya (Yakitory-style)

Thursday, September 17

Excursion to Mount Ikoma

THU
9/17

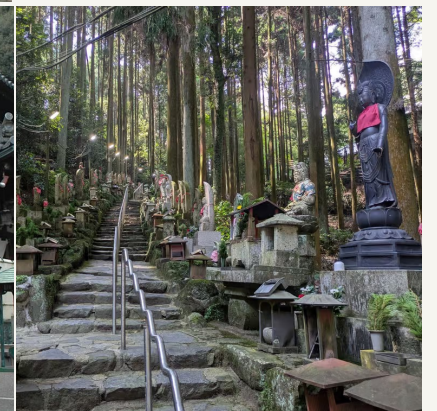

23° 19°

Mostly cloudy, afternoon rain

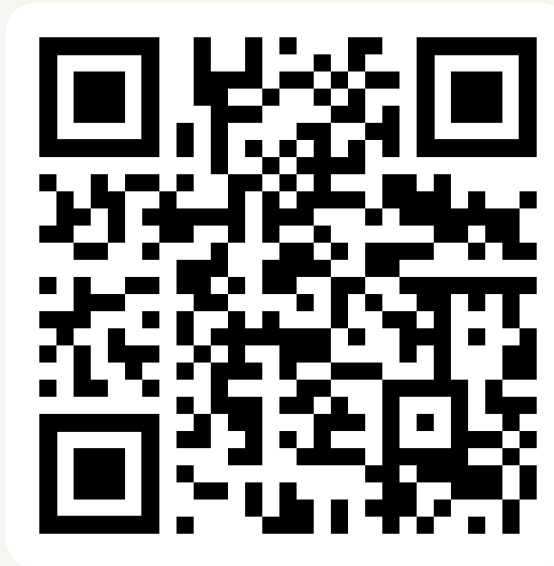

Partly cloudy

70%

Looking forward to a great week working with you all!
